WILLIAM A. O'NEILL
GOVERNOR

STATE OF CONNECTICUT
EXECUTIVE CHAMBERS
HARTFORD

November 1983

It is with great pride that I present Connecticut Occupational Statistics, an impressive three volume document containing occupational data by sex, race and Spanish Origin for Connecticut's civilian labor force. The document identifies over 600 occupational categories for the race groups of White, Black, American Indian and Eskimo, and Asian and Pacific Islander as well as the ethnic group of Spanish Origin.

These volumes of data should prove invaluable in assisting Connecticut state agencies and other public and private agencies and businesses in preparing their annual affirmative action plans utilizing data obtained from the 1980 Census of Population and Housing. On a broader scale, it should greatly assist our state government in continuing its efforts in equal employment opportunity and affirmative action planning.

Also, I am especially optimistic about the potential use of this data in relationship to employment and jobs programs. In thinking about our future jobs, we must be aware of the current composition of our labor force with as much detail as possible.

Over recent years, great strides have been made by Connecticut state government to provide equal employment opportunity for its citizens. It is my hope Connecticut Occupational Statistics will contribute significantly to our continuing affirmative action efforts.

William A. O'Neill
Governor

City of New Britain 287
Town of West Hartford 313

Glossary G-1

INTRODUCTION

The Connecticut Occupational Statistics provides occupation data from the Bureau of the Census Equal Employment Opportunity (EEO) Special File. Data is presented for over 600 occupation groups according to the sex and race or Spanish Origin of those persons in the civilian labor force.

This report consists of three volumes, each covering a certain geographic portion of the State of Connecticut (see Geographic Coverage).

Although the report will have many uses both now and in the future, the primary use will be for affirmative action planning for both public and private sectors. With few exceptions, all organizations that receive Federal or State funds must prepare an Affirmative Action Plan. The data in this document will provide most of the base data necessary to complete such plans.

The last pages of each section throughout this report contain special aggregations of occupational groups, as specified by the Equal Employment Opportunity Commission (EEOC), which must be used when reporting to it. For example, if a governmental agency has to file a plan with the Federal government it would use an EEO-4 Form. The necessary base data for this EEO-4 form has been aggregated, compiled and is presented on the final pages of each section.

Other uses of this data are varied. Some examples follow:

Career planning
Labor force occupations projections
Marketing studies
Curriculum planning
Labor pool identification/location
Vocational training needs analysis

Users of occupational data should be aware of the differences of the data within this report to earlier census data or other sources. There are two major influences which affected comparability of the data between the 1980 Census data in this report and 1970 Census data. The first was the introduction of a new occupational code scheme called the Standard Occupational Code Scheme. The second relates to the way the data for Persons of Spanish Origin are reported. Both of these make comparability between 1970 and 1980 difficult.

In this report, persons of Spanish Origin are only listed in one group, that being Spanish Origin. For example, a person who is Black-Spanish, will only be listed within the Spanish Origin group and not the Black group. Thereby, leaving all other Blacks that are not of Spanish Origin to be listed under the table heading "Black, Not Hispanic."

For a complete description of Spanish Origin and race, refer to the Glossary at the end of this report. For a further discussion of the relationship between the data in this report and other data, refer to sections "Data Comparisons between 1980 and 1970" and "Relationship to Other 1980 Occupational Data."

The data used in this report was collected from a sample of the population. By collecting data from only a portion of the population, certain occupational groups could be overstated while others could be understated. The sampling techniques may also overstate or understate certain race or Spanish Origin groups.

When there is a small number of persons in a certain occupation, there is a greater possibility that some of the race or Hispanic groups will not be represented accurately. A case in point can be found by examining the occupational category "Legislators" for the State of Connecticut (see pages 2 and 3).

As can be seen, the sample data reports that there were a total of 188 legislators in Connecticut in 1980, of which 77 were identified to be White-female and 111 White-male. There are none in the remaining race or Spanish Origin groups. In actually this is not the case, since in 1980 there were 5 Black legislators. Thus, the data in this report does not account for every person's occupation, race and origin. Instead it looks at a portion of the population and derives figures that closely represent the total population. Statewide 16.2% of the population responded to the occupation questions in the 1980 Census, and this percentage varies throughout the state. (Refer to Table 2).

BACKGROUND OF EQUAL EMPLOYMENT OPPORTUNITY SPECIAL FILE

The Equal Employment Opportunity (EEO) Special File was produced by the Bureau of the Census to help meet the needs of both government and private industry for data from the 1980 Census of Population and Housing in planning EEO/Affirmative Action Programs.

In 1978, the National Planning Data Corporation (NPDC), at the request of a group of private companies called Organization Resources Counselors, Inc. (ORC) contracted with the Census Bureau to produce a set of special tabulations from the 1970 Census of Population that could be used for affirmative action program planning. Under the same contract, the NPDC marketed the data from this file, popularly called the "ORC Tapes." Knowing that the demand would be even greater for these same types of data during the 1980's, the Census Bureau decided to produce the EEO Special File as a counterpart summary tape file from 1980 census data.

The following federal government agencies which are concerned with equal employment opportunity and civil rights issues contributed advice in establishing this file: the Equal Employment Opportunity Commission (EEOC); the U.S. Department of Labor, particularly the Office of Federal Contract Compliance Progams (OFCCP), the Employment and Training Administration (ETA), and the Office of Civil Rights; the U.S. Office of Personnel Management (OPM); and the Office of Federal Statistical Policy and Standards (OFSPS), which is now part of the U.S. Office of Management and Budget (OMB). The Census Bureau also received comments from companies in the private sector.

The EEO file contains two basic tabulations which will not be available in other Census Bureau tape files or publications: detailed occupation by sex, race and Spanish Origin; and years of school completed by age, sex, race, and Spanish Origin. (This second table is not a part of this report). The EEO computer file provides data for all states, counties, SMSA's, and for places with a population of 50,000 or more.

Summary Tape File 5 and the printed State reports PC80-1-D, Characteristics of the Population: Detailed Characteristics also will provide tables with other variables pertinent to affirmative action planning, such as income and earnings, veteran status, and occupation by industry. Note that these data will only be presented for employed civilians and not the entire civilian labor force, as is the case with this report.

DATA COMPARISONS BETWEEN 1980 AND 1970

The Connecticut Occupational Statistics report has been prepared using occupation data from the 1980 Equal Employment Opportunity (EEO) Special File. The EEO Special File is the 1980 counterpart to the 1970 census file popularly known as the "ORC tapes," as discussed earlier.

Users will have problems, however, comparing data from the 1980 Census/EEO Special File with 1970 data. One of the major procedural differences between the 1970 and 1980 censuses is in the classification systems used for coding occupations. Prior to the 1980 census there was no government-wide standard on which to base the successive decennial census occupational classification systems. In 1977 the Office of Federal Statistical Policy and Standards (OFSPS) developed the Standard Occupational Classification (SOC) system for use by all Federal agencies. The 1980 data is the first based on this SOC system.

Most occupation experts agree that the arrangement of the new classification is an improvement over the one used in 1970. Another advantage will be greater consistency among government sources of occupation data. However, the price paid is comparability with 1970 since many occupation groups and categories will be only partially comparable. These comparability problems will complicate EEO and other studies attempting to measure change since 1970.

Some of the differences in the classification structure are as follows:

- Working proprietors in sales and other sales managers who perform some of the same duties as the workers they supervise are now classified as "sales supervisors" rather than "managers."
- "Cashiers" and some "counter clerks, except food" were transferred from "clerical" to "sales workers."
- The farming occupations were expanded to include related off-farm activities; so some former "laborers" (e.g., gardeners) were transferred to this group.
- Some 1970 "operatives" were moved to "precision production occupations," such as "butchers and meat cutters," "dressmakers," "drywall installers" and "precision assemblers."
- Conversely, some 1970 "craft workers" moved to "machine operators," or to "transportation and material moving occupations"; examples are "job setters" (those that set up a machine for others), "printing press operators," "locomotive operating occupations," "excavating and loading machine operators," among others.

Appendix C in the Technical Documentation of the Equal Employment Opportunity Special File provides the relationship between major occupation groups used in the 1980 and 1970 Censuses of Population. Furthermore, to assist users in making comparisons of the detailed occupation groups, the Bureau of the Census is preparing a technical paper tracking changes from 1970 to 1980. Also, the Bureau and the Social Science Research Council are studying the possibility of preparing additional materials, including a computer tape with detailed comparative data to aid users. The Bureau will furnish further information on developments in this area, through the Connecticut Census Data Center, Office of Policy and Management, 80 Washington Street, Hartford, CT 06106.

RELATIONSHIP TO OTHER 1980 OCCUPATIONAL DATA

Because employment data from the census are obtained from respondents in households, they differ from statistics based on reports from individual business establishments, farm enterprises, and certain government programs. Persons employed at more than one job are counted only once in the census and are classified according to the job at which they worked the greatest number of hours during the reference week. In statistics based on reports from business and farm establishments, persons who work for more than one establishment may be counted more than once. Moreover, other series, unlike those presented here, may exclude private household workers, unpaid family workers, and self-employed persons, but may include workers less than 16 years of age.

All occupational data from the 1980 Census of Population was collected using the "long-form" questionnaires which were given to a sample of the population. Therefore, occupational data is available on the summary tape files and printed reports that contain sample data. The summary tape files (STF) that have occupational (sample) data are: STF3, STF4, and STF5. STF3 has 13 major occupational categories. STF4 has 70 occupation groups by race and sex, and STF 5 provides other occupational tables that include income, veteran status and industry, among others.

Generally, the Census Bureau produces basic tables such as those in STF3 for almost every geographic area (i.e. State, Cities and Towns, Tracts, etc.). However, as the data becomes more detailed, information for the smaller areas is discontinued. This is due to two factors, the first being the sample size for the area. If only few people were sampled for a small town in Connecticut, it is possible that the data collected would not represent the people and their characteristics; therefore, the data is not presented. Confidentiality is the other factor. If there are fewer than 30 people in an area, or of a specific race/Hispanic group, then the data will be suppressed.

The detailed information on STF4 and STF5 are available only for the larger areas within the state. The general rule above holds true for Census Bureau printed reports as well. "General Characteristics" reports will contain data for almost all areas, while "Detailed Characteristics" reports will contain data for only large areas.

The standard Census Bureau summary tapes and reports present occupational data for employed civilians. This report, however, is taken from the EEO Special File, which provides occupational data for the entire experienced civilian labor force, (this includes those who are unemployed, but have worked sometime between 1975 and 1980).

It should be emphasized, that EEO data is for the entire civilian labor force, whereas, all other 1980 Census data is only for the employed civilians. The EEO data within this report has been compared with data from other 1980 Census data in STF3. This enabled employment status by occupation data to be created. Table 1 on the following page, illustrates the data comparison made between these two files and the resultant data on unemployed persons.

Agreement has been made that occupational data for affirmative action planning should utilize data on the entire civilian labor force, as is presented in this report.

TECHNICAL ASPECTS OF THE DATA

Data from the Equal Employment Opportunity (EEO) Special File are based on the 1980 census sample. The data are estimates of the actual figures that would have resulted from a complete count. Estimates can be expected to vary from the complete count result, because they are subject to two basic types of error - sampling and nonsampling. The sampling error in the data arises from the selection of persons and housing units to be included in the sample. The nonsampling error, which affects both sample and complete count data, is the result of all other errors that may occur during the collection and processing phases of the census. A brief discussion of both sampling and nonsampling error is provided in the following sub-sections.

Sample Design

While every person and housing unit in the United States was enumerated on a questionnaire that requested certain basic demographic information (e.g. age, race, relationship), a sample of persons and housing units was enumerated on a questionnaire that requested additional information. The basic sampling unit for the 1980 census was the housing unit, including all occupants. For persons living in group quarters, the sampling unit was the person. Two sampling rates were employed. In counties, incorporated places, and minor civil divisions (these are cities and towns in Connecticut) estimated to have fewer than 2,500 persons (based on precensus estimates), one-half of all housing units and persons in group quarters were to be included in the sample. In all other places, one-sixth of the housing units or persons in group quarters were sampled. The purpose of this scheme was to provide relatively more reliable estimates for small places. When both sampling rates were taken into account, 16.2 percent of Connecticut's population were included in the census sample.

The sample designation method depended on the data collection procedures. In about ninety-five percent of the country, the census was taken by the mailout/mailback procedure. Table 2 shows the percent of persons in the sample for each geographic area contained with this report.

Since the data in this report are based on a sample, they may differ somewhat from complete-count figures that would have been obtained if all housing units, persons within those housing units, and persons living in group quarters had been enumerated using the same questionnaires, instructions, enumerators, etc. The data in this report is from just one of many possible samples of the population at a particular time. The deviation of the data in this sample from the average of all possible samples is called the sampling error.

Table 1: 1980 CONNECTICUT EMPLOYMENT STATUS BY OCCUPATION CATEGORY

	* * * * Experienced Workers[1] * * * *			
Major Occupation Category	Civilian Labor Force[2]	Employed Persons[3]	Unemployed Persons[4]	Per Cent Unemployed
Executive, Admin. & Managerial	184,738	181,233	3,505	1.9%
Professional Specialty	215,196	211,724	3,472	1.6%

Control of Nonsampling Error

Nonsampling error is present in both sample and complete count data. If left unchecked, this error could introduce serious bias into the data, the variability of which could increase dramatically over that which would result purely from sampling. The primary sources of nonsampling error are described below.

Undercoverage: It is possible for some households or persons to be entirely missed by the census. This undercoverage of persons and housing units can introduce biases into the data. Several extensive programs were developed to focus on this important problem including:

- The Postal Service reviewed mailing lists.
- Purchased commercial mailing lists were updated and corrected by a complete field review.
- A record check was performed to reduce the undercoverage of individual persons in selected areas.
- A recheck of units initially classified as vacant or nonexistent was utilized to further reduce the undercoverage of persons.

Respondent and Enumerator Error: The person answering the questionnaire or responding to the questions posed by an enumerator could serve as a source of error by offering incorrect or incomplete information. To reduce this source of error, questions were phrased as clearly as possible based on precensus tests and detailed instructions for completing the questionnaire were provided to each household. For example, if labor force items were incomplete for a person 16 years or older, long form field edit procedures would recognize the situation and a followup attempt to obtain the information was made.

Processing Error: The many phases involved in processing the census data represent potential sources for the introduction of nonsampling error. The processing of the census questionnaires includes the field editing, followup, and transmittal of completed questionnaires; the manual coding of write-in responses (e.g. occupation) and the electronic data processing. The various field, coding and computer operations undergo a number of quality control checks to insure their accurate application.

Nonresponse: Nonresponse to particular questions on the census questionnaire allows for the introduction of bias into the data, since the characteristics of the nonrespondents have not been observed and may differ from those reported by respondents. Some protection against the introduction of large biases is afforded by minimizing nonresponse. In the census, nonresponse was substantially reduced during the field operations by the various edit and followup operations aimed at obtaining a response for every question. Characteristics for the nonresponses remaining after this operation were allocated by the computer using reported data for a person or housing unit with similar characteristics.

The method of calculating standard errors and confidence intervals for the EEO data is described for both sampling and nonsampling errors, in the Technical Documentation for the Equal Employment Opportunity Special File, available from Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

Suppression

In this report, the categories "TOTAL ALL RACES" and "TOTAL CIVILIAN LABOR FORCE" for each geographic area are never suppressed.

The individual race/Hispanic groups in this report are subject to suppression. The suppression rule states the data for a specific race/Hispanic category will appear only when there are 30 or more persons in that race/Hispanic group living in the geographic area. The only geographic area that has suppressed data in this report is the Town of West Hartford, which is in Volume 3.

An example of suppression follows. In county 001 assume there are 22 persons classified as Asian and Pacific Islander (both Hispanic and not Hispanic). Since this does not meet the criteria of 30 persons in the specific race category, the occupation data for the Asian and Pacific Islander's (total and non-Hispanic) for county 001 are suppressed. This is called primary suppression. Suppressed data is indicated by three asterisks (***).

In some cases complementary suppression is applied to prevent the derivation of suppressed data by subtraction. For instance, if data were available for all race/Hispanic categories except one, the suppressed data could easily be derived from the total. When complementary suppression is applied on the EEO file, data are suppressed from the smallest race/Hispanic category having 30 or more persons or from one of the "other" categories. There is no differentiation in this report between the data that are suppressed by primary suppression or by complementary suppression.

GEOGRAPHIC COVERAGE

The 1980 EEO Special File which was the source for this report has data available for the State of Connecticut, its counties, SMSA's, and selected places with a 1980 population of 50,000 or more.

Note that in 1980, the Meriden SMSA and the City of Meriden were geographically the same. Therefore, Meriden data is presented only once in this report, under "Meriden SMSA."

The Bureau of the Census defines selected cities and towns within Connecticut as "places." Of the 18 cities and towns in Connecticut, with a 1980 population of 50,000 or more, only 14 have EEO data available. The four for which data are not available are the Town of Greenwich, the Town of Fairfield, the Town of Hamden, and the City of Milford. These areas are not included because they are not considered as "places" with a 1980 population of 50,000 or more. For a more complete explanation of Census Bureau geographic requirements for including areas within the EEO Special File, contact the Connecticut Census Data Center, Office of Policy and Management, 80 Washington Street, Hartford, CT 06106.

There are 34 different geographic areas within Connecticut for which EEO data is available. The Connecticut Occupational Statistics presents this data in three volumes which cover the following sections of the state:

Volume 1 - Western Connecticut
Volume 2 - South-Central Connecticut
Volume 3 - North Central and Eastern Connecticut

Each volume contains a statewide summary and data for the covered SMSA's, counties, towns and cities in that section of Connecticut.

TECHNICAL ASSISTANCE

The preparation of EEO/Affirmative Action Plans requires a basic understanding of the data, related terminology, and procedures. The following is presented to assist in these matters.

Assistance with Procedures:

Filing a Plan with the Connecticut Commission on Human Rights and Opportunities (CHRO):

State agencies and all other employers that file with CHRO - - contact Connecticut Commission on Human Rights and Opportunities, 90 Washington Street, Hartford, CT 06106, (203) 566-5563.

Employers using Connecticut Job Service for hiring, recruiting or compliance - - contact Equal Opportunity Unit, Connecticut Department of Labor, 200 Folly Brook Boulevard, Wethersfield, CT 06109, (203) 566-2319.

Filing a Plan with the Equal Employment Opportunity Commission (EEOC):

All institutions of higher education (both public and private) - - contact the Office of Educational Opportunity, Department of Higher Education, 61 Woodland Street, Hartford, CT 06105, (203) 566-3913.

All State agencies, commissions and boards, except for institutions of higher education - - contact Affimative Action Program Office, Bureau of Personnel and Labor Relations, Department of Administrative Services, 165 Capitol Avenue, Hartford, CT 06106, (203) 566-5248.

Employers using Connecticut Job Service for hiring, recruiting or compliance - - contact Equal Opportunity Unit, Connecticut Department of Labor, 200 Folly Brook Boulevard, Wethersfield, CT 06109, (203) 566-2319.

Employers who are federal contractors - - contact the Area Director, U. S. Department of Labor, Employment Standards Administration, Office of Federal Contract Compliance, One Hartford Square West, North Building, Suite 302, Hartford, CT 06106, (203) 722-3563.

Municipalities, other public and private employers (including those listed above) - - contact the EEO-(1, 4, 5 or 6) Coordinator, Survey Division, Equal Employment Opportunity Commission, 2401 E Street, NW, Washington, DC 20507, (703) 756-6022.

Assistance with the Data or Definitions within this Report:

Any agency or employer - - contact either the Connecticut Census Data Center, Office of Policy and Management, 80 Washington Street, Hartford, CT 06106, (203) 566-8285 or the Office of Research and Information, Connecticut Labor Department, 200 Folly Brook Boulevard, Wethersfield, CT 06109, (203) 566-5590.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO 5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

Notes: (1) Numerous categories within the EEO-5 Form draw from the same occupation groups; therefore, some data is repetitious.
(2) Distinctions between "Faculty" and "Professional Non-Faculty" are not always clear. Some professionals also teach college-level courses; however, the majority do not. Therefore, "Faculty" are those whose primary occupation is college teaching.

GLOSSARY

The following definitions pertain to data items included in the *Connecticut Occupational Statistics* report, which extracted data from the Equal Employment Oppportunity (EEO) Special File. These definitions were obtained, with slight modification, from the *1980 Census Users' Guide*.

AGE - Age at last birthday, i.e., number of completed years from birth to April 1, 1980, based on replies to a question on month and year of birth. This item was asked on a complete-count basis.

Limitations: Historically, undercoverage of the population has been associated with age. Young adults, especially Black males, were missed at a higher rate than other segments of the population. An analysis of the 1980 Census data is not yet available.

CLASS OF WORKER AND INDUSTRY - This report shows data for selected occupation groups by class of worker and a few major industries. The information on industry and class of worker refer to the same job as the respondent's occupation. The industry statistics are based on the 1980 census detailed classification system developed from the U.S. Standard Industrial Classification (SIC) system. The definitions of the class of worker categories shown in this report are as follows:

> Salaried employees - Persons who work for a private employer or for any Federal, State or local governmental unit for wages, salary, commission, tips, pay-in-kind, or at piece rates; this category includes persons who work as employees of their own incorporated business or trade.
>
> Self-employed - Those who work for profit or fees in their own unincorporated business, profession, or trade or who operate a farm or who work without pay in a family business or farm.

LABOR FORCE STATUS - Persons 16 years old and over were classified as to their status in the labor force based on replies to several questions relating to work activity and status during the reference week. These items were asked on a sample basis.

> **Armed Forces** - Persons 16 years old and over on active duty in the Army, Air Force, Navy, Marine Corps and Coast Guard, (indicated in responses to the question on industry). Members of the merchant marine and civilian employees of the Department of Defense are not members of the Armed Forces. Service in a National Guard or reserve unit for short periods of active duty for training does not count as active duty in the Armed Forces. Data for members of the Armed Forces are not included in this report.
>
> **Experienced Civilian Labor Force (Experienced Workers)** - This report includes civilian employed persons and those civilian unemployed persons who have worked at any time since 1975, i.e., "experienced unemployed." (Occupation and industry data were not collected for persons who have never worked, or who have not worked since 1975). Excluding those persons in the category "unemployed, no civilian work experience since 1975," this report contains occupational data for the experienced civilian labor force.

Unemployed, No Civilian Work Experience Since 1975 (Inexperienced Workers) - Persons are classified as unemployed with no civilian work experience since 1975 if they reported themselves as unemployed in 1980 and one of the following: (a) their last job since 1975 was in the Armed Forces; or (b) they last worked in 1974 or earlier; or (c) they reported that they had never worked. For analysis purposes these persons are referred to as "Inexperienced Workers."

Census Historical Comparability: In 1940, 1950, and 1960, labor force data were published for persons 14 years and over. In 1970, most labor force data were for persons 16 years old and over to comply with the official Government definition of employed and unemployed instituted in 1967, although data on 14-year olds and 15-year olds were furnished in 1970 to provide a comparability bridge with earlier censuses.

N.E.C. - An abbreviation for Not Elsewhere Classified. Used in this report to describe categories for all remaining groups.

OCCUPATION - The kind of work the person was doing at a job or business during the reference week (which in most cases was the last week in March, 1980) or, if not at work, at the most recent job or business if employed since 1975. Persons working at more than one job were instructed to describe the one at which the person worked the most hours during the reference week. Occupation is most frequently tabulated for employed persons 16 years old and over, and less often for the experienced civilian labor force, which includes both employed and experienced unemployed persons 16 years old and over. Occupation data were also collected but are not tabulated for persons not currently in the labor force who have worked since 1975. Occupation is not determined for persons in the Armed Forces. Occupation data were collected on a sample basis.

The write-in responses concerning occupation on the census questionnaire were used to assign and code the respondent to one of over 600 occupation categories. Only the code is retained on census basic records and public-use microdata. Census occupation categories are fully defined in the Classified Index of Industries and Occupations, PHC80-R3. Persons wishing to use the census system in coding other data bases may use the Alphabetical Index of Industries and Occupations, PHC80-R4. Both of these reference manuals are available from the U.S. Government Printing Office, Washington, D.C. 20402.

Relation to Standard Occupational Classification: The 1980 Census occupation categories generally are based on the Standard Occupational Classification (SOC) system, originally issued in 1977 by the Office of Federal Statistical Policy and Standards and revised in 1980. One of the major purposes of the SOC is to promote uniformity and comparability in the presentation of occupational data collected by various agencies. Appendix A of the Technical Documentation of the Equal Employment Opportunity Special File defines the relationship between the 3-digit census codes and the revised 4-digit SOC codes.

Summary and major occupation categories are as follows:

- Managerial and professional specialty occupations:
  - Executive, administrative, and managerial occupations
  - Professional specialty occupations

Technical, sales, and administrative support occupations:
  Technicians and related support occupations
  Sales occupations
  Administrative support occupations, including clerical

Service occupations:
  Private household occupations
  Protective service occupations
  Service occupations, except protective and household

Farming, forestry, and fishing occupations

Precision production, craft, and repair occupations

Operators, fabricators, and laborers:
  Machine operators, assemblers, and inspectors
  Transportation and material moving occupations
  Handlers, equipment cleaners, helpers, and laborers

This report shows detailed occupations. The detailed census categories, and the Standard Occupational Classification definition for each are listed in Appendix A of the Technical Documentation of the Equal Employment Opportunity Special File. Technical Documentation is available from Data User Services Division, Customer Services, Washington, D.C. 20233.

Census Historical Comparability: Occupation has been asked in each census since 1850. The 1980 occupation question differs from its 1970 counterpart primarily by omitting a request for the respondent's job title. Because this information sometimes proved misleading, it was dropped for 1980.

The major difference in occupation data for 1970 and 1980 stems from the adaptation of census occupation coding to the new Standard Occupational Classification system, first issued in 1977.

While many of the broad categories observed in the 1980 scheme have been designed to offer a general measure of compatability with many 1970 categories, the principles governing the classification and many of the detailed categories have been altered substantially. Reference materials on the relationships of 1970 and 1980 occupation classifications are being prepared. For more information, contact Population Division, Bureau of the Census, Washington, D.C. 20233.

RACE - All persons were asked to identify themselves according to the following race categories on the 1980 questionnaire: White, Black or Negro, American Indian, Eskimo, Aleut, Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, and Other. The "Other" category includes Malayan, Polynesian, Thai, and other groups not included in the specific categories listed on the questionnaire.

This item was asked on a complete-count basis. It should be noted that Spanish Origin is not a race group. Persons who identifies themselves as Spanish Origin are also identified by a race group, (e.g. Black-Spanish Origin, Other-Spanish Origin). The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock.

Since the 1980 Census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify themselves. For persons with parents of different races who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used.

Counts of the population by race in complete-count tabulations are provisional. Final counts for race were determined after the sample data was processed. The sample counts first appeared on tape on STF3 and in print in Characteristics of the Population, General Social and Economic Characteristics (PC80-1-C) reports. Race data in this report is taken from sample data, therefore, the race counts are final.

Limited edit and review operations were performed during the complete-count operations; write-in responses were reviewed in an attempt to classify entries to specific categories, where apropriate. For instance, if the "Other" circle was marked with a write-in entry "Caucasian," then the response was recoded as White. (Additional examples are noted below.) However, all such cases were not identified in the complete-count processing. During the processing of sample questionnaires, a more thorough review and additional editing was done to resolve inconsistent or incomplete responses. Also, during the processing of sample questionnaires, write-in entries for the "Other" category were assigned specific codes, which is included on the person's basic record in the census sample detailed tape files.

Asian and Pacific Islander write-in entries, such as Indo-Chinese, Cambodian, or Polynesian, included in the "Other" category during 100-percent processing, are collectively tabulated and shown as "Other Asian and Pacific Islander" in the census sample tabulations; this group, "Other Asian and Pacific Islanders," will be included in the broader Asian and Pacific Islander category in all sample tabulations by race. This shift of "Other Asian and Pacific Islander" entries out of the "Other Races" category in sample tabulations and the recoding of write-in entries in the "Other" category to specific categories where appropriate will affect the comparability between complete-count and sample data for some groups.

White - Persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response such as Canadian, German, Italian, Lebanese, or Polish. (Persons who did not classify themselves in one of the specified race categories but wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "Other races" category; in the 1970 census most of these persons were included in the "White" category).

Black - Persons who indicated their race as Black or Negro, as well as persons who did not specify themselves in one of the specific race categories, but reported entries such as Black Puerto Rican, Haitian, Jamaican, Nigerian, or West Indian.

American Indian, Eskimo, and Aleut:

American Indian - Persons who indicated their race as "Indian (American)" or who did not indicate a specific race category but reported the name of an Indian tribe.

Eskimo - Persons who indicated their race as "Eskimo."

Aleut - Persons who indicated their race as "Aleut."

Asian and Pacific Islander - In complete-count tabulations, includes all of the groups listed below except "Other Asian and Pacific Islander." In sample tabulations, it includes all of the groups listed below.

Japanese - Persons who indicated their race as Japanese, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Nipponese or Japanese American.

Chinese - Persons who indicated their race as Chinese, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Cantonese, Formosan, Taiwanese, or Tibetan.

Filipino - Persons who indicated their race as Filipino, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as Filipino American or Philippine.

Korean - Persons who indicated their race as Korean, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Korean American.

Asian Indian - Persons who indicated their race as Asian Indian, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as Bengali, Bharati, Dravidian, East Indian, Goanese, Hindu Indic, Kashmiri, or South Asian.

Vietnamese - Persons who indicated their race as Vietnamese, as well as persons who did not classify themselves in one of the specific race categories, but reported a response such as Vietnam.

Hawaiian - Persons who indicated their race as Hawaiian. In the State of Hawaii, all persons who reported "Part-Hawaiian" were included in this category.

Guamanian - Persons who indicated their race as Guamanian, as well as persons who did not classify themselves in one of the race categories, but reported an entry such as Chamorro or Guam.

Samoan - Persons who indicated their race as Samoan, as well as persons who did not classify themselves in one of the specific race categories, but entered a response such as American Samoan or Western Samoan.

Other Asian and Pacific Islander - In sample tabulations only, persons who reported Cambodian, Hmong, Indo-Chinese, Laotian, Pakistani, Polynesian, Fiji Islander, Tahitian, Thai, or similar responses. Census basic records include codes for over 50 separate race groups within this category.

Other Races - Includes all other races (except "Other Asian and Pacific Islander" groups) which were not included in the specific categories listed on the census questionnaire. For example, persons reporting in the "Other" race category and providing write-in entries such as Eurasian, Cosmopolitan, Inter-racial, or a Spanish Origin group (e.g., Mexican, Cuban, or Puerto Rican) were included in Other Races.

Limitations: Historically, undercoverage of the population has been associated with race. An analysis of the coverage for the 1980 Census has not yet been completed by the Census Bureau. Undercoverage rates for races, other than White or Black, will not be prepared because the vital records used in the analysis do not distinguish among other races.

Census Historical Comparability: Questions on "race" or "color" have been asked in each census since 1790. In 1970, when persons with parents of different races were in doubt as to their classification, the race of the father was used. In 1980, the race of the mother was used for persons who could not provide a single response. The 1970 category "Negro or Black" has been retitled "Black or Negro." Individual categories for Vietnamese, Asian Indian, Guamanian, and Samoan have been added. In 1970, the categories Eskimo and Aleut appeared only on questionnaires used in Alaska; they were replaced by Hawaiian and Korean in all other states. In 1980, all four categories appeared on the questionnaire. As a result of the additions, the 1980 questionnaire had 14 specific race categories instead of 8 as in 1970.

In 1970, persons who did not report a specific race but wrote in Hispanic categories such as "Mexican," "Puerto Rican," or "Cuban" in the race question were assigned to White; for 1980 these persons remain in the "Other Races" category.

SPANISH ORIGIN - Determined by a complete-count question which asks respondents to self-identity whether they are of Spanish Origin or descent. If, when interviewed, the person reported a multiple origin and could not provide a single origin, the origin of the person's mother was used. If a single response was not provided for the persons mother than the first reported origin of the person was used.

Counts of the population by Spanish Origin in complete-count tabulations are provisional. Final counts for Spanish Origin were determined after the sample data was processed. The sample counts first appeared on tape in STF3 and in print in Characteristics of the Population, General Social and Economic Characteristics, PC80-1-C reports. This report contains the final Spanish Origin counts, which were taken from sample data.

Persons marking any one of the four "Spanish" categories, i.e., Mexican, Puerto Rican, Cuban, or other Spanish on the census questionnaire are collectively referred to as "Persons of Spanish Origin," or "Hispanic." Preliminary evaluations of 1980 census data suggest some limited misreporting of Spanish Origin across the nation. Available evidence indicates that the misreporting may have occurred only in selected areas with relatively small Spanish Origin populations, such as in some Southern states, but it is not apparent in those areas with the largest concentrations of Spanish Origin persons.

For a fuller discussion of the reporting in the Spanish Origin item, see the 1980 Census Supplementary Report, "Persons of Spanish Origin by State: 1980" (PC80-S1-17). The qualifier, Not Hispanic, is used in this report to distinguish between different groups according to race and Spanish Origin. For example, "Black, Not Hispanic," refers to those persons who identified themselves as Black, and excludes those Blacks that are of Spanish Origin.

Census Historical Comparability: The Spanish Origin question was asked on a 100-percent basis for the first time in 1980. A similar question was asked on the 1970

5-percent sample questionnaire. For 1980, the category "No, not Spanish/Hispanic" appeared first (the corresponding category appeared last in 1970). Also, the terms "Mexican-American" and "Chicano" are added to the term "Mexican." The category "Central or South American," included in 1970, was dropped.

Although a question on Spanish Origin was included in 1970, it was not the major identifier used to classify the Hispanic population in the 1970 census as it was in 1980. Depending on the section of the country, 1970 census data for "Persons of Spanish Heritage" were variously defined as "Puerto Rican Birth or Parentage" (in New York, New Jersey, and Pennsylvania), as "Persons of Spanish Language or Spanish Surname" (in Arizona, California, Colorado, New Mexico, and Texas), and as "Persons of Spanish Language" (in the remaining 42 states and the District of Columbia). "Spanish Language" referred to those persons who in 1970 reported Spanish as their mother tongue, as well as persons in families in which the household head or spouse reported Spanish as his or her mother tongue.

STANDARD METROPOLITAN STATISTICAL AREA (SMSA) - A large population nucleus and nearby communities which have a high degree of economic and social integration with that nucleus.

In New England, each SMSA consists of cities and towns that meet specific standards pertaining to population, commutation, and metropolitan character. For the remainder of the country, one or more entire counties (or county equivalents) are the basic units comprising an SMSA. SMSA's are designated by the U.S. Office of Management and Budget.

In addition to the consideration of commutation, SMSA's must meet at least one of the following criteria:

- Includes a city with a population of at least 50,000 within its corporate limits, or
- Includes a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 75,000 in New England (or 100,000 elsewhere).

Census Historical Comparability: Between 1970 and 1980 the metropolitan areas within Connecticut have changed considerably. These changes consist primarily of additional cities or towns being added to existing metropolitan areas.

Effective June 30, 1983, metropolitan boundaries have been reevaluated using 1980 census data on commuting, labor force, population density, type of residence, and population growth, according to new criteria presented in the Federal Register, January 3, 1980 (vol. 45, no. 2, pt VI).

At that time, new outlying areas have been added or existing ones deleted, some area titles have changed and new central cities designated, some areas have been consolidated, and a few new metropolitan areas have been created. Further, the term "standard metropolitan statistical area" was shortened to "metropolitan statistical area" (MSA). These changes will not affect publication of 1980 census data for SMSA's (including the occupational data in this report). For further information concerning MSA's contact the Connecticut Census Data Center, Office of Policy and Management, 80 Washington Street, Hartford, CT 06106.
